Not sure what private trackers are all about?

Check out the wiki and update it yourself if you want more instead of complaining like a fucking faggot. https://wiki.installgentoo.com/index.php/Private_trackers

How to get into private trackers (and survive): <http://pastebin.com/ecGRiQhk>

Paths to get into trackers: <http://pastebin.com/X7zTdhis>

What.CD Interview Notes: <http://pastebin.com/Wgz6T7ta>
<https://www.whatinterviewprep.com/>

Use [>>>/g/ptg](#) as a link to find the /ptg/ thread.

Remember the following:

>staff occasionally read these generals and have posted here before.
>staff may pretend to be normal users asking for invites and when you invite them, they ban you for inviting strangers
>people may report emails and other personal info posted here to staff to get you banned.
>most of the invite offers here are people trolling you with false hope.
>begging for invites is a waste of time and you should just interview
>the above does not apply to oppaitime

Exigo might be shutting down:

"Long story short, thanks to someone giving the site exposure on a torrent invite site and my PayPal account being permanently disabled as a result, EXIGO is going to have to shut down. I just got the bill, I have no way of paying it. It'll probably be down in a week or two. Sad, but nothing I can do.

I'll save a copy of the site, but have nowhere to host it.

Note I probably won't deal with PayPal again and do not want to pay with my credit card or bank account, for obvious reasons. This whole thing has actually hurt my livelihood- as a freelance programmer I was getting paid through PayPal. TL;DR: Fuck PayPal."

Fugg, I want to say that you're close to HD-Maniac but moving up on your own would require sacrificing your average seed time of which you need at least one month for the recruitment thread that awaits.

I'm on everything I want to be on bar HDB so I'm in no rush. I finally have time off this weekend so I've started reseeding ~300 PTP torrents already and will move on to AHD then BTN hopefully before I sleep.

Once I've done that my seed time will go up again fairly quickly

Easily, put it this way.

You have 700GB buffer which will allow you to download between 150 and 200 internal encodes (75% freeleech remember)

So download 100 movies you'd really like to see and seed them for a month or two.

Done.

Total seedtime is easy. Just seed everything you download 24/7. If you do that for a couple months, you can get the 20 years.

He might have an average seed time it's misleading because he doesn't have many snatches. If he snatched 100 movies right now his average seed time would drop 75%.

It's not the same as somebody with an average seedtime of two weeks that's snatched 300 movies for example.

he has 52 snatched torrents with an average seeding time 102 days.

he needs 73 more snatches. say he downloads them all now, his avg seeding time is now $(52 \cdot 102 + 73 \cdot 0) / 125 = \sim 42$ days, which is over one month.

now either i'm failing basic math here, which is entirely possible, or he's gonna be alright.
